

Following are step-wise instructions, if needed, for correcting Bandbro's failure to launch after upgrading to the Macintosh High Sierra OS.

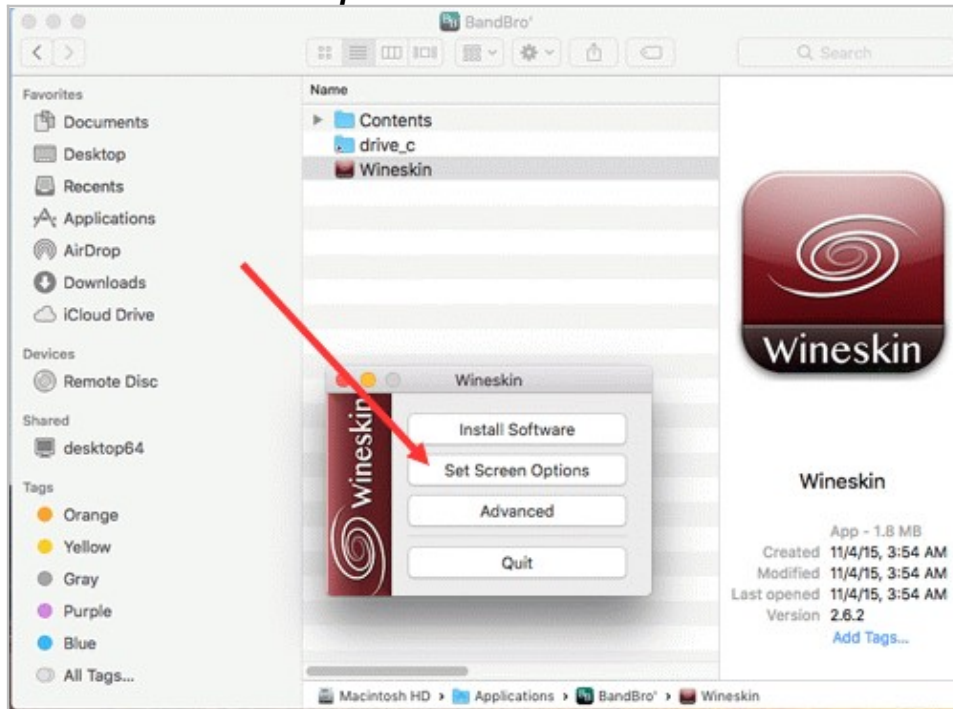

1. From Applications, right click on Bandbro and select Show Package Contents

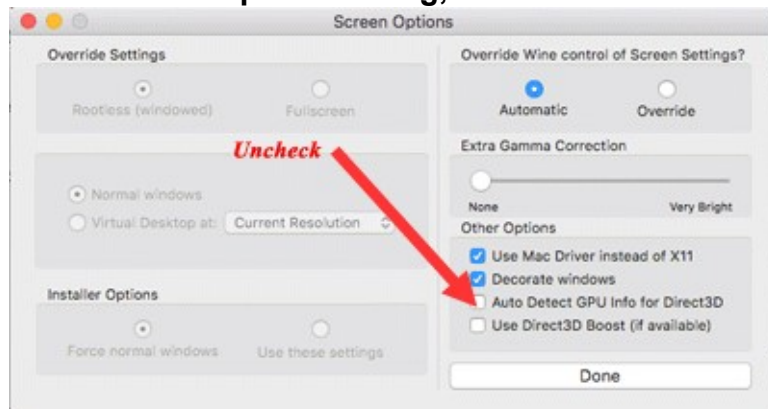

2. From the resulting window, double-click the Wineskin application

3. Click Set Screen Options

4. On Screen Options dialog, *clear* the Auto Detect GPU checkbox

Click Done, close all windows **RESTART THE COMPUTER** and start Bandbro'
